

The Coliseum's delta 3000 oval pool system incorporates aluminum tie bars and a waterplate. Providing exceptional structural integrity for oval pools. The delta 3000 system was engineered to ensure maximum swimming area for minimal space.

OPTIONAL DECK - Out-of-the-box compatibility with factory-built decks and fences. Contact your dealer for more details.

WATER SAFETY

Your above ground pool has been designed to provide you with years of safe family fun. This entails that water safety must always be taken into account. When used incorrectly, your above ground swimming pool can be dangerous; above ground pools are shallow, and this makes diving and jumping unsafe. To ensure your above ground pool is used safely you must observe the safety precautions that are provided to you when you purchase an above ground pool and conform to all local regulations.

ALUMINUM Advantages

Why choose an aluminum above ground pool?

- **Corrosion resistance.** Aluminum's very atomic structure makes it resistant to rust and corrosion, which means it can stand up to soil, minerals, moisture and chemicals.
- **Total reliability.** There's a reason that aluminum is the material of choice for the airline, automotive and construction industries. Fighter jets, skyscrapers, scaffolding and bridges - aluminum is the material people trust.
- **Incredible strength.** Pound for pound, aluminum is twice as strong as steel, and even stronger compared to resin. When it comes to retaining the pressure of thousands of pounds of water, aluminum is always up to the challenge.
